**Appendix 5 – Calculations based on past completions and Deposit LDP  
annual housing requirement.**

# Flintshire County Council Housing Monitoring Statement April 2019

## 1.0 SUMMARY

- 1.1 There is currently no up-to-date development plan for Flintshire as the Unitary Development Plan is time expired and there is no adopted Local Development Plan (LDP). Welsh Government Guidance as set out in Technical Advice Note 1 (TAN1) Joint Housing Land Availability Studies (JHLAS), January 2015 states 'Therefore local planning authorities that do not have either an adopted LDP or UDP will be unable to demonstrate whether or not they have a 5 year housing land supply and effectively will be considered not to have a 5 year supply. Those LPAs without an adopted development plan will be unable to produce a JHLAS until an adopted LDP is in place. However, it is still important to monitor the level of housing provision and annual completions.
- 1.2 This document summarises the housing data as at 1<sup>st</sup> April 2019 for the purposes of monitoring and to contribute towards the evidence base for the LDP. It follows the guidance in TAN1 and contains the Council's estimates of the number of units likely to be completed in the next five years.

## 2.0 HOUSING LAND SUPPLY

- 2.1 The five year land supply comprises large and small sites with planning permission (outline or full), remaining site allocations for housing in adopted development plans, and sites with a resolution to grant planning permission subject to a S106 agreement being signed, categorised as prescribed in TAN 1. The supply also includes those site allocations in existing adopted development plans which the local authority considers are likely to come forward. A number of existing development plan allocations have been removed from the study as in the local authority's view development is unlikely.
- 2.2 It is acknowledged that TAN1 requires Local Authorities producing a formal Joint Housing Land Availability Study to use the residual method when calculating the housing land supply. However as referenced in para. 1.1 above as the UDP is time expired under the guidance in TAN 1 Flintshire is unable to carry out a formal Study and the Council is considered not to have a 5 year supply. This monitoring report does however incorporate (for information only), calculations of the housing supply based on both past completions rates and also the Deposit LDP annual requirement as it is felt this is helpful in providing an indication of the level of housing land supply.

2.3 TAN1 categorises sites as follows:

Category 1	Sites or the phases of sites which are under construction (relating only to the area where building is in progress).
Category 2	Sites or the phases of sites where development either can commence immediately or the constraint on development is likely to be removed so that there is reasonable time for dwellings to be completed within 5 years.
Category 3	Sites or phases of sites where the Study Group agree that it is not financially viable to develop the site due to market conditions, but which are otherwise free from constraints. (Although Category 3 sites will not form part of the 5-year supply, their identification may assist local planning authorities, developers and landowners in finding opportunities to improve site viability and deliverability.)
Category 4	Sites or the phases of sites where development is unlikely within 5 years by virtue of major physical constraints or other constraints as agreed by the Study Group.

## Large Site Supply

**Table 1 – Identified Housing Land Supply**

<b>Housing Land Supply (1<sup>st</sup> April 2019 to 1<sup>st</sup> April 2024) – Large Sites</b>					
	5 Year Land Supply (TAN 1 categories)		Beyond 5 Years		Homes Completed Since Last Study (Large and small sites)
	Cat 1 (u/c)	Cat 2	Cat 3	Cat 4	
<b>Total</b>	370	2163	878	0	(381+73)= 454

**Table 2 – Five year land supply breakdown – large sites (i.e. Catgs 1 and 2)**

Private	2330
Social	203
<b>Total</b>	<b>2533</b>

## Small Site Supply

- 2.4 The contribution from small sites of less than 10 dwellings is based on the recorded completions for the last five years.

**Table 3 – Small Site Completions for the Previous 5 Years**

2014-15	2015-16	2016-17	2017-18	2018-19	Total
81	87	102	104	73	<b>447</b>
<b>5 year average ( 447/5)</b>					<b>89</b>

- 2.5 The overall 5 year supply from these large and small sites is **2980 dwgs (2533 + 447)**.

## Supply from S106 Sites

- 2.6 As stated in paragraph 2.1, sites that have a resolution to grant planning permission subject to the signing of a S106 agreement can contribute to the 5 year supply. This is on the basis that the resolution to grant was prior to 31<sup>st</sup> March 2019, and that there is a clear intention from the applicant to develop the site within a five year period.

**Table 4 – Supply from S106 Sites**

<b>Sites</b>	<b>Units</b>
Small sites	1
Large sites	60
<b>Total</b>	<b>61</b>

- 2.7 In total, all the source of the 5 year land supply amount to 3041 units.

<b>Source</b>	<b>Units</b>
Large sites (category 1 and 2)	2533
Small sites	447
Sites pending S106 (large and small sites)	61
<b>Total</b>	<b>3041</b>

### 3.0 CONCLUSION

- 3.1 Given that the Council is currently unable to demonstrate a 5 year land supply under the terms of TAN 1, a guidance note for developers has been produced which seeks to ensure that speculative sites put forward on the basis of a lack of housing land supply are genuine and developed development proposals, as opposed to simply adding supply on paper only and not an exercise in simply adding value to land (<http://www.flintshire.gov.uk/en/PDFFiles/Planning/FCC-Developer-Guidance-Note-Speculative-Housing-Development.pdf>) .
- 3.2 With regard to housing land supply, the Council welcomed the Ministers letter of 18/07/18 and the dis-application of para 6.2 of TAN1 (removal of the 'considerable' weight to be given to increasing housing land supply), alongside a wider 'Call for Evidence'. In its submission in response to the call for evidence the Council expressed its view that the present TAN1 methodology is flawed in respect of the assumption that Local Authorities with no adopted LDP are deemed not to have a 5 year supply, and also that using the residual method alone does not provide an accurate reflection of the actual land supply. The Council has experienced a large number of speculative planning applications, some of which have been granted planning permission and some which have been refused. This has generated concern for local communities and undermined the preparation of the LDP in terms of the diversion of resources.
- 3.3 The Council is also aware that since the Study base date the Welsh Government has undertaken a consultation on the possibility of removing TAN 1 and its five year supply calculation
- 3.4 Actual housing completions in the County have averaged 536 units per annum over the first four years of the LDP period. This average annual completion rate is very similar to the annual housing provision figure (including flexibility) in the LDP of 530 (7950/15).
- 3.5 Under the terms of TAN 1 the Council is unable to undertake a formal Joint Housing Land Availability Study incorporating a land supply calculation based on the 'residual' method. To provide some informal indication of the level of the land supply Appendix 5 of the Report however incorporates tables indicating how the identified land supply relates to the level of past building rates over 5 and 10 year periods and also to the annual housing requirement in the Deposit LDP.
- 3.6 While the Council acknowledges that these are not formal calculations under the current terms of TAN 1, they at least show the level of supply compared with what the development industry is achieving on the ground and also with the annual housing requirement contained in the Deposit LDP. It is also acknowledged, as explained in para. 3.7 below, that the LDP has yet to be submitted to the Welsh Government and Planning Inspectorate and will be subject to Examination by an independent Inspector. All comparisons are therefore included purely for information.
- 3.7 The Council considers the most appropriate means by which to increase housing land supply is through the preparation of the Local Development Plan. Following

a Call for Candidate Sites, engagement and consultation on the strategic growth and spatial options, and the publication of a pre-deposit consultation draft Plan (Preferred Strategy), the Council placed the LDP on Public Deposit on 30<sup>th</sup> September 2019. The LDP identifies sites based on a rigorous and transparent assessment and against an agreed spatial strategy rather than on an ad hoc basis. The Council does not therefore intend to implement any further formal steps to increase housing land supply, as to do so would divert resources away from progressing the LDP. It is intended that the LDP, which includes housing allocations throughout the County capable of accommodating some 3168 units, will be formally submit to the Welsh Government & Planning Inspectorate in the summer of 2020.

3.8 Pending the progression of the LDP to Adoption, as per TAN1, there are two ways in which the Council can facilitate sustainable housing development which will improve the housing land supply. Firstly, the Council will continue to work with landowners and developers in bringing forward appropriate and sustainable windfall housing sites that are policy compliant as well as addressing any difficulties or obstacles preventing the delivery of allocated sites. Applications for sites within settlement boundaries will generally be looked upon favourably provided that they satisfy the Plan's policies. Applications on sites outside of existing settlements will be assessed on their individual merits in terms of whether they represent logical and sustainable development having regard to material planning considerations and will not be approved merely because they would increase housing land supply. They must also be capable of demonstrating that they can positively increase supply in the short term (e.g. by granting a short term permission) otherwise they would not be capable of meeting the requirements of TAN1, particularly in relation to deliverability. Now that the LDP has been through Deposit stage, prematurity may also be a consideration.

3.9 Secondly, the Council is presently progressing its Strategic Housing and Regeneration Programme (SHARP) [http://www.flintshire.gov.uk/en/Business/Strategic-Housing-and-Regeneration-Programme/Strategic-Housing-and-Regeneration-Programme-\(SHARP\).aspx](http://www.flintshire.gov.uk/en/Business/Strategic-Housing-and-Regeneration-Programme/Strategic-Housing-and-Regeneration-Programme-(SHARP).aspx) which aims to develop 500 social, affordable and rent to buy homes the next 5 years. The Programme also has scope for the Council to include land for the development of private market homes, where sites contribute to the overall Programme i.e. the delivery of affordable housing. The preferred development partner, Wates Living Space was appointed in May 2015 and has progressed a number of schemes with more currently in progress and others due to come forward. The table below shows the SHARP schemes as of February 2020.

Site	Settlement	Units	Status
Batch 1			
The Walks, Duke St	Flint	92	Complete
Custom House, Mold Rd	Connah's Quay	12	Complete
		<b>104</b>

## APPENDIX 5

### Past Completions Calculations

As stated above the 5 year supply is 2872 in total.

### 5 Year Past Completions

A	Total Previous 5 Year Completions (2015-2019)	2719
B	Average Annual Completions	544
C	Total 5 Year Land Supply	3041
D	Land Supply in Years (C/B)	5.59 yrs

### 10 Year Past Completions

A	Total Previous 10 Year Completions (2009-2019) <sup>1</sup>	4484
B	Average Annual Completions	448
C	Total 5 Year Land Supply	3041
D	Land Supply in Years (C/B)	6.79 yrs

<sup>1</sup>As no annual completion figure is available for 2010 (see Appendix 2) an average of the two year figure for 2009 & 10 has been used to provide a 2010 completions figure for use in the 10 yr calculation.

### Comparison with annual requirement in Deposit LDP

A	Total Housing Requirement as set out in Deposit LDP	6950
B	Annual Requirement (A/15)	463
C	Total 5 Year Land Supply	3041
D	Land Supply in Years (C/B)	6.6 yrs
