

# Telecare Service

October 2017

Providing a range of Telecare equipment that supports independence

Telecare is a range of sensors and detectors such as:

- Intellilink alarm system and pendant
- Flood detector
- Smoke detector
- Falls detector
- Web based technology

Telecare equipment can be linked to a 24 hour monitoring service or through to a mobile phone or carer alert system. Whatever your situation, help can be summoned.

What will it cost?

The Telecare equipment is available following an assessment to anyone who lives in Flintshire and feels it may make a difference to their lives.

There is a one off payment of £25 plus VAT for the installation. Also there is a monitoring charge of £2.20 plus VAT a week.

Who are we?

Telecare is part of Social Services. We focus on early intervention, aiming to maintain independence. Reablement, Telecare and equipment and adaptations are examples of early intervention services. These help prevent people from becoming unnecessarily dependent on others and requiring more intensive support.
